1. Claims 44 to 49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

This is consistent with that noted in the previous office action.

2. Claims 36 to 42 and 50 to 53 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. At least some of the various gelling agents found in these claims are not embraced by the gelling agent as found in amended claim 1.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1 to 43, 50 to 69, 77 and 78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cai et al.

The teachings of Cai et al. and how they apply against the instant claims has been addressed in previous office actions. As such this will not be repeated.

The Examiner provided detailed reasons as to why one having ordinary skill in the art would have found the addition of a pigment to the composition of Cai et al. to have been obvious. The Examiner maintains this position of obviousness regardless of the fact that Cai et al. specifically title their invention "clear". This does not distract from the obviousness as noted in the previous office action. See page 3, the full paragraphs after section 7, through the top of page 4. Applicants' remarks regarding the fact that the composition of Cai et al. is clear does not overcome this rejection. The Examiner notes that applicants do not address the specific position of obviousness detailed in the previous office action.

Applicants also state that Cai does not teach or suggest the specified gelling agents. The Examiner notes that for many of the independent claims, such as 63, 65

and 67, do not require any specific gelling agents. On the other hand, the Examiner notes that at least the hexamethylene bis (10-undecenamide) on column 18 meets the formula XXV in claim 1. As such applicants' amendment and remarks fails to overcome this rejection.

For new claims 77 and 78, see column 15, lines 22 to 26.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday and Wednesday to Friday, 10am to 4pm.
